Indian Wells, CA*

Join us for – FROM
ROADBLOCKS TO
Recovery

www.LIAFoundation.org

We invite you to attend our 4th annual conference called "From Roadblocks to Recovery". This conference is for physicians, families and individuals who are affected by autism spectrum disorder, Lyme disease and associated disorders. We welcome you to come and learn from the most cutting edge physicians on the planet who are treating these conditions day in and day out in their practices. You will enjoy a fantastic line-up of speakers and have fun connecting with other families sharing in your journey.

Physicians will enjoy top notch training from some of the most knowledgeable physicians during our physicians training day on Thursday and throughout the entire conference. You won't be disappointed by the incredible information to be shared by these fantastic speakers.

Parents and patients will walk away with the tools they need to find a doctor and implement a treatment plan that strives for the ultimate thriving of their family. We can't wait for you to experience what many have said about our previous conferences such as...

"This is the best conference I've ever been to!"

"This conference is 10 years ahead of its time!"

"It feels like I've come home, I've finally found other people who are going through what I am going through."

We will also have a vendor room, sporting over 40 vendors who carry cutting edge products and resources for our physicians and families. You don't want to miss out on talking with them about the new and exciting products they have to offer.

OUR MISSION:

1. To encourage – through our awareness programs – parents, physicians and the community on the importance of testing for borrelia, mycoplasma and many multiple-infections in their children with Autism Spectrum Disorder.
2. To educate the autism community, both doctors and parents, and others on which treatments are available, how to find a doctor knowledgeable in borrelia, mycoplasma and multiple-infections and connect parents with mentors who can help guide them through their journey.
3. To educate parents, physicians and the community on the dangerous environmental triggers such as electromagnetic frequencies, genetically modified foods, toxic perfumes, pesticides, toxic chemicals and forced vaccination programs which may hinder the healing of our children and our families.
4. To provide a support system and network for families both online and in person.
5. To assist and support any parent and/or caregiver with any concerns for their special needs child in the state of California. Our parent support meetings specifically focus on special education, regional center, medical insurance and the like.
6. Offer a calendar of events for parents and caregivers to participate in special education, regional center, department of developmental services, health and human services, medical insurance and other fields of significance which directly affect our families.
